Introduction

This Solvency and Financial Condition Report ('SFCR') has been prepared in line with the requirements of the Solvency II (SII) Regulations and, together with the accompanying Quantitative Reporting Templates (QRTs), describes Octium Group business operations, performance, governance structure, risk profile, solvency, and capital position as of 31 December 2024.

This is a single SFCR that incorporates consolidated information at Group level, and information at the level of each insurance subsidiary.

The SFCR is designed to assist all clients and stakeholders to better understand the capital position of the Group under Solvency II.

Approval

This SFCR and the supporting QRTs have been approved by the Group Board of Directors on 15 May 2025, prior to submission to the Central Bank of Ireland ('CBI') and publication on the Group website.

Summary

Octium Holding S.A. ("Octium Holding"), a mixed activity insurance holding company incorporated and resident in Luxembourg, is the ultimate parent entity of the insurance group to which Octium Life DAC ("Octium Life"), Octium International Insurance Agent AG ("Octium International Insurance Agent"), Octium Services (Switzerland) AG ("Octium Services") and KLP S.à.r.l (a non-regulated dormant company) belong (collectively referred to as "Octium Group" or "Group").

The Group is an independent international insurance group specialising in the design, manufacture and distribution of unit-linked life insurance products. The Group has policyholder assets worth approximately €8.3 billion and operates in European markets with a unique offering of unit-linked insurance products for wealth and succession planning.

Octium Holding is subject to group supervision under Solvency II Regulations and is required to make publicly available an annual report on the solvency and financial condition of the Group. Below is a summary of the Group's business and risk profile, key changes and events in 2024.

Business and performance

The principal activity of the Group is the insurance activities undertaken by Octium Life (an 'insurance subsidiary'). The business has been resilient in the face of the challenging macroeconomic and geopolitical conditions of 2024 earning an operating loss before tax of €4.5m (2023: €1.0m).

Premiums and positive asset market performance largely offset negative claim experience during the year leaving the group with assets under management of €8.3bn (2023: €8.4bn) at year-end.

System of governance

Octium Holding's Board of Directors (the "Group Board") is accountable for the long-term success of the business and is responsible for the key governance, strategy, regulatory, planning and risk management processes that operate at Group level.

Certain decisions and key matters are, however, considered and addressed directly by the Board of the relevant insurance subsidiary.

The Group Board has established effective governance and control systems to manage Group business activities and risks.

There have been no material changes in the system of governance during the year.

Risk profile

The Group is exposed to risks outlined in section C below. The most significant risks are market and lapse risk.

- Market Risk: A decline in assets under management due to market shocks, poor market performance, or fluctuations in currency and exchange rate movements would reduce future annual management charges and, consequently, future profits.
- **Lapse Risk**: Likewise, a decrease in assets under management caused by elevated lapse/surrender rates would lead to a decrease in future annual management charges. This could be triggered by factors such as shifts in the economic climate, poor investment performance, competitor activities, or damage to the Group's reputation.

Octium Life a solo insurance entity within the Group has established a robust risk management and internal control system to monitor and manage these risks. Although these risks may impact on future profitability, they do not have a significant impact on the Group's ability to meet payments to clients.

Policyholder investments are managed on a unit-linked basis, with Octium Life ensuring it is always able to meet policyholder withdrawal requests. The low-risk nature of the business means that the Group's Solvency Ratio remains resilient to changes in the business. There have been no material changes to the risk profile during the year.

Solvency and capital management

The Group manages its balance sheet prudently to ensure solvency is maintained adequately throughout the business cycle. The Group and Octium Life invest in assets to match policyholder liabilities. The Group and each insurance subsidiary is required to keep a buffer in excess of policyholder liabilities to cover potential losses arising from business risks. The Boards of the Group and Octium Life ensure that capital is adequate to cover the expected requirements in the short to medium term.

The Group and Octium Life has eligible own funds in excess of solvency capital requirement ("SCR"). As of 31 December 2024, the Group's SCR ratio is 184% (2023: 161%) and Octium Life's SCR ratio is 229% (2023: 181% after the payment of planned dividends). The solvency ratio provides a measure of the amount of excess capital relative to regulatory requirements.

The Group does not plan to make a dividend payment to the shareholder during 2025.

Other information

This report has been prepared in accordance with the requirements of the Solvency II Directive as of 31 December 2024. The Group's financial year runs to 31 December each year and report their results in Euro.

Octium Life's financial statements are prepared on the basis of Financial Reporting Standard 102 applicable in the UK and Republic of Ireland (FRS 102). The Group's consolidated financial statements are prepared in accordance with Luxembourg Generally Accepted Accounting Principles.

On 31 December 2024 Octium Life completed a cross-border merger by acquisition pursuant to the European Union (Cross-Border Conversions, Mergers and Divisions) Regulations 2023. Octium Life acquired all the assets and liabilities with all rights and obligations attached thereto of Octium Assurance AG and its branch Octium Assurance AG (Italian Branch) (collectively "Octium Assurance"). Octium Assurance was dissolved without going into liquidation.

A. Business and Performance

A.1 Business

Octium Holding, a mixed activity insurance holding company incorporated and resident in Luxembourg, is the ultimate parent entity of Octium Life and Octium International Insurance Agent for the purposes of group supervision in accordance with Regulation 216(3)(b) of S.I. 485 of 2015 (the "Solvency II Regulations"). Octium Holding and its subsidiaries form a specialist life assurance group.

The Group is an independent international insurance group specialising in the design, manufacture and distribution of unit-linked life insurance products. Octium Group has policyholder assets of approximately €8.3 billion and operates in global markets with a unique offering of unit-linked insurance products for wealth and succession planning.

A.1.1 Subsidiary information

Octium Life is an Irish domiciled and authorised insurance company whose principal activity is the transaction of cross-border life insurance business. Octium Life was established in 2003 originally as UBS International Life Limited but its name changed following its acquisition by the Octium Group in May 2017.

Octium International Insurance Agent, is a Liechtenstein domiciled company, incorporated in early 2020 to provide insurance intermediation on behalf of Octium Group. In September 2020, Octium International Insurance Agent was granted a life insurance agent licence by the FIMA for insurance distribution purposes.

The Group acquired Credit Suisse Life and Pensions AG (renamed Octium Assurance AG ("Assurance AG")), a Credit Suisse subsidiary that focuses on High Net Worth ("HNW") individuals resident in Italy and Germany. The transaction received regulatory approvals and was completed on 31 December 2021.

On 31 December 2024 Octium Life completed a cross-border merger by acquisition pursuant to the European Union (Cross-Border Conversions, Mergers and Divisions) Regulations 2023. Octium Life acquired all the assets and liabilities with all rights and obligations attached thereto of Octium Assurance AG and its branch Octium Assurance AG (Italian Branch) (collectively "Octium Assurance"). At the merger date Octium Assurance accounted for circa 42% of the technical provision of the merged entity.

Octium Services was formed in November 2021 to provide policy administration services to other entities within the Group.

KLP S.à.r.l. is a 100% owned subsidiary of Octium Holding. It is a company incorporated in Luxembourg and is a former life insurance company of Kaupthing Life & Pension S.A., with corresponding license returned in 2015 and is now a non-regulated dormant company.

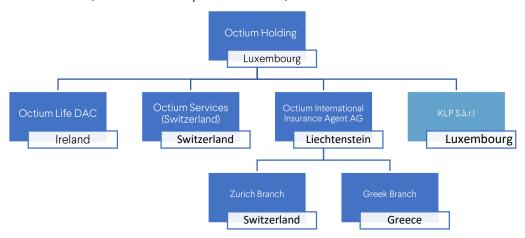

| Name of Company | Octium Holding S.A. | Registered Address: 35 Avenue J. F. Kennedy L-1855 Luxembourg Luxembourg |
|-----------------|---------------------|---|
|-----------------|---------------------|---|

| Group Auditors | Deloitte Ireland LLP | Deloitte & Touche House, 29 Earlsfort Terrace Dublin 2 Ireland, D02 AY28 |
|--|---------------------------------|---|
| Regulatory Supervisor of the Group & Octium Life | Central Bank of Ireland ("CBI") | New Wapping Street, North Wall Quay, Dublin 1, Ireland. |

A.1.2 Group Shareholdings

The group structure below shows the entities within the scope of group supervision up to the 31 December 2024 (100% ownership at each level).

A.1.3 Products

The Group offers unit linked life assurance products with an open architecture, on a Freedom-of-Services basis, in Cyprus, Germany, Greece, Italy, Portugal and Spain. Prior to the completion of the merger on 31 December 2024, Octium Assurance offered its unit linked life assurance in other markets including in Italy on a freedom of establishment basis. The Group also accepts applications from Egypt, UK and Turkey provided the application is intermediated on a compliant basis by a regulated distributor.

The main product offering is a portfolio bond, which allows policyholders to link their policy to a unique pool of assets ('policy fund') managed by their chosen asset manager or investment advisor. The value of the policy is directly tied to the performance of the underlying assets The Group does not offer products with guaranteed investment returns.

The unit-linked business model means that the financial positions of the Group remained resilient throughout the year.

A.1.4 Significant events

Other than the merger as discussed in Section A.1.1 of this report, there were no other significant events in the Group during the reporting period.

A.2 Underwriting performance

Octium Holding's financial statements are prepared in accordance with Luxembourg Insurance Accounting Law. Under these accounting standards, the majority of unit linked policies are

classified as investment contracts whereby premiums and claims are shown as deposits to and payments from investment contracts.

Accounting profits for the insurance subsidiaries are largely driven by policy administration fees received, net of commissions and other expenses as well as risk fees net of reinsurance and risk claims. Changes in the value of investments underlying unit linked policies are offset by corresponding changes in the value of technical provisions.

Accounting profits for the Group are driven by the profits from the subsidiaries net of finance costs borne by Octium Holding. The Group has defined accounting profits as an appropriate measure of its underwriting performance.

A.2.1 Overview of Group accounting profits

| Overview of accounting profits | ccounting profits Octium Life | | Octium A | ssurance | Group | |
|---|-------------------------------|-------|----------|----------|---------|---------|
| (€′000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Gross accounting profit/(loss) | 1,095 | 4,634 | - | 2,025 | (4,451) | 90 |
| Tax charge | (2,815) | (687) | - | 978 | (2,824) | (1,070) |
| (Loss)/Profit attributable to the shareholder | (1,720) | 3,947 | - | 1,047 | (7,275) | (980) |

A.2.2 Group's risk fees net of reinsurance

Risk fees are the element of policy charges that relate to mortality risk and the payment of death risk benefits. The table below details the risk fees earned net of reinsurance.

| Piels food (6'000) | Octio | um Life | Octium A | ssurance | Group | |
|---------------------------------------|---------|---------|----------|----------|---------|---------|
| Risk fees (€'000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| | | | | | | |
| Risk fees earned | 2,789 | 1,271 | - | 1,429 | 2,789 | 2,700 |
| | | | | | | |
| Reinsurer's share net of profit share | (1,480) | (501) | - | (913) | (1,480) | (1,414) |
| | | | | | | |
| Net Risk fees | 1,309 | 770 | - | 516 | 1,309 | 1,286 |

A.2.3 Premiums written by the Group

The table below details the premiums written during the year as reported in QRT S.05.01.

| Dramiuma written (6'000) | Octium Life | | Octium Assurance | | Group | |
|--------------------------|-------------|---------|------------------|---------|---------|---------|
| Premiums written (€′000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Gross | 238,078 | 607,000 | - | 113,494 | 238,078 | 720,494 |
| Reinsurer's share | (1,046) | (139) | - | (913) | (1,046) | (1,052) |
| Net Premiums | 237,032 | 606,861 | - | 112,581 | 237,032 | 719,442 |

A.2.4 Group's death risk benefits net of reinsurance

The table below details the death risk benefits incurred.

| Donth hamafita (6'000) | Octium Life | | Octium Assurance | | Group | |
|------------------------|-------------|-------|------------------|-------|-------|---------|
| Death benefits (€'000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Death risk benefits | 765 | 209 | - | 1,154 | 765 | 1,363 |
| Reinsurer's share | (530) | (145) | - | (942) | (530) | (1,087) |
| Net Death benefits | 235 | 64 | - | 212 | 235 | 276 |

A.2.5 Group's claims incurred

The table below details total claims incurred as reported in QRT S.05.01.

| Total Claims (6'000) | Octium Life | | Octium Assurance | | Group | |
|----------------------|-------------|---------|------------------|-----------|---------|-----------|
| Total Claims (€′000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Gross claims | 997,968 | 281,828 | - | 1,018,507 | 997,968 | 1,300,335 |
| Reinsurer's share | (393) | - | - | (942) | (393) | (942) |
| Net claims | 997,575 | 281,828 | - | 1,017,565 | 997,575 | 1,299,393 |

A.3 Investment Performance

Other than some small cash deposits held by Octium International Insurance Agent, Octium Services and Octium Holding to cover administration expenses, the Group's assets consist of Octium Life's assets.

The unit linked nature of the business means that the impact on profit of investment performance is second order. The Group's primary source of income is policy administration fees charged on the value of unit linked insurance contracts. The Group is therefore exposed to market risk on unit linked investments to the extent that adverse movements in the value of these assets would reduce the future profitability through a decline in policy administration fees.

All client investments are selected by the policyholder from a pre-approved list of funds or by investment managers who are appointed in accordance with a specific investment mandate. Excess assets above those required to match policyholder unit liabilities are held as cash or high-quality liquid assets.

A.3.1 Description of Group assets

The following investments are held in respect of policyholder linked assets.

| Accet Time | 202 | 24 | 2023 | | |
|-------------------------------|------|-----------|------|-----------|--|
| Asset Type | % | €′000 | % | €′000 | |
| Cash and deposits | 3% | 228,453 | 4% | 297,957 | |
| Collective Investment Schemes | 63% | 5,250,518 | 64% | 5,405,365 | |
| Equities | 11% | 941,454 | 8% | 700,791 | |
| Fixed Income Securities | 18% | 1,450,022 | 20% | 1,658,170 | |
| Other | 5% | 389,606 | 4% | 317,266 | |
| Total Assets | 100% | 8,260,053 | 100% | 8,379,549 | |

A.3.2 Group investment return

Investment return comprises interest, dividends and other income receivable, realised and unrealised gains and losses on investments and is net of related investment management fees and other account-keeping charges.

| Investment Return (€'000) | Octium Life | | Octium A | ssurance | Group | | |
|---------------------------|-------------|---------|----------|----------|---------|---------|--|
| | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 | |
| Interest income | 2,777 | 883 | - | 2,007 | 2,777 | 2,890 | |
| Other investment income | 675,059 | 319,956 | - | 301,685 | 675,059 | 621,641 | |
| Total Investment return | 677,836 | 320,839 | - | 303,692 | 677,836 | 624,531 | |

Asset performance during 2024 followed global market trends, which saw positive performance throughout the year.

A.4 Performance of Other Activities

The Group's primary activity is manufacture of unit linked insurance products. Income is primarily derived from the fees charged to the policyholders for policy administration.

Fees are charged as a percentage of the policy value and are thus affected by the performance of the underlying assets as well as premium and claim levels. The performance of the policies therefore depends on the performance of the assets selected and the expense relating to asset management, custody of assets and policy administration fees. The income for the current and previous years is shown below:

A.4.1 Group other technical income net of reinsurance

| Other Technical Jacons (6'000) | Octium Life | | Octium | Assurance | Group | | |
|-------------------------------------|-------------|--------|--------|-----------|---------|--------|--|
| Other Technical Income (€'000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 | |
| Administration fees | 30,541 | 16,263 | - | 12,880 | 30,541 | 29,143 | |
| Reinsurance premiums and net claims | (1,491) | (405) | - | 304 | (1,491) | (101) | |
| Other technical income | 29,050 | 15,858 | - | 13,184 | 29,050 | 29,042 | |

A.4.2 Octium Group's operating expenses

Group expenses consist of the expenses of Octium Holding, Octium Life, Octium International Insurance Agent and Octium Services along with interest on the senior debt.

| Operating Francisco (6'000) | Octium Life | | Octium / | Assurance | Group | |
|--------------------------------|-------------|--------|----------|-----------|--------|--------|
| Operating Expenses (€'000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Acquisition and administration | 23,789 | 8,491 | - | 10,777 | 24,731 | 19,874 |
| Commission paid | 6,125 | 3,374 | - | 2,146 | 6,125 | 5,520 |
| Change in deferred acquisition | 53 | 33 | _ | _ | 53 | 33 |
| cost | 33 | 33 | _ | _ | 33 | 33 |
| Death claims | 765 | 209 | - | 212 | 765 | 421 |
| Operating expenses | 30,732 | 12,107 | - | 13,135 | 31,674 | 25,848 |

The increase in operating expenses reflect the costs associated with the merger and a negative experience on death claims.

A.4.3 Change in value of the Italian substitute tax asset

Octium Life act as withholding tax agents for the Italian tax authorities, making advance payments in respect of Italian policyholder exit tax. Recovery is made when exit taxes are levied on chargeable gains.

Payments to the Italian Revenue are recognised as a tax receivable. All recoveries are charged against the asset. The asset is initially recognised at cost with its recoverable amount assessed annually for impairment by the Board of Directors.

No impairment provision was recognised at 31 December 2024.

A.4.4 Any other information

All material information regarding the business and performance of Octium has been set out above.

B. System of Governance

B.1 General Information on the system of governance

The Group Board is the supervisory body at the level of the Insurance Group Parent Company with responsibility for the overall direction, risk appetite and management of the Group and for ensuring the Group complies with applicable laws rules and regulations. It decides on the strategic aims and the necessary financial and human resource requirements based on recommendations of the Group Executive Committee and Group Executive Chairman. The Group Board is responsible for ensuring:

- adequate mechanisms to monitor, manage and report significant intra-group transactions as well as significant risk concentrations within the Group;
- eligible own funds are available which are always at least equal to the SCR;
- that adequate systems and procedures are in place to identify and measure risks at the level of the Group;
- to ensure that an own risk and solvency assessment is carried out at the level of the Group;
- and to comply with other group supervision requirements, including regular reporting to the Group supervisor.

B.1.1 Group Executive Committee

The Group Board has established a Group Executive Committee ("Group ExCo") to whom it has delegated the management of the Group under the leadership of the Group Executive Chairman.

The Group ExCo consists of at least five persons (each an "ExCo Member"), having collective empowerment for the purpose of governing the Group in a compliant way according to their duties. The Group ExCo is composed of any CEO of the Insurance Carrier(s) forming part of the

Group along with any individual appointed by the Group Board of Directors to take up group executive responsibilities, further covering the following group executive functions:

- Group Executive Chairman ("Group Chairman")
- Group Chief Executive Officer ("Group CEO")
- Group Chief Risk Officer ("Group CRO")
- Group Chief Financial Officer ("Group CFO")
- Group Chief of Sales and Business Development ("Group CBDO")

The Group ExCo oversees the management of the Group and its affiliates, including business strategy, risk appetite and financial objectives, where relevant upon recommendation of the respective affiliates' CEOs. In particular, the Group ExCo is responsible for the following:

- Development of long-range plans and the Group business model.
- Review and evaluate the Group's consolidated budget and forecasts.
- Implementation of the Group Risk Management Framework including risk strategy, risk tolerance, risk identification, risk measurement, risk monitoring, risk reporting and the way the principal risks are managed, controlled and mitigated.
- Review and assess the effectiveness of Group's practices with respect to its insurance business purpose.

- Oversee compliance with group supervision regulatory and legal obligations.
- Monitoring of the Group's SCR and solvency ratios.
- Identifying, monitoring, managing and reporting intra-group transactions, including significant and very significant intra-group transactions.
- Establish, evaluate and approve the principles of an adequate organisation and resource allocation.

B.1.2 Organisational Structure

Octium Life, the sole insurance entity within the Group has its own Board recognising its obligation to take decisions independently in the interest of their clients, as well as to meet relevant legal and governance responsibilities.

The Octium Life Board is the supervisory body with responsibility for the overall direction, risk appetite and management of the entity and for ensuring the company complies with applicable laws, rules and regulations. It decides on the strategic aims and the necessary financial and human resource requirements based on recommendations of its Management Committee and Chief Executive Officer.

At least annually, the Octium Life Board reviews its own performance, as well as the performance of its committees to determine whether they are functioning effectively and efficiently.

B.1.3 Boards of Directors

B.1.3.1 Octium Life

As of 31 December 2024, the Octium Life Board comprised of one Executive Director, one Non-Executive Directors and two Independent Non-Executive Directors.

| Board Member | Туре |
|---|------------------------------------|
| Jean-Francois Willems | Non-Executive Director |
| Joan Collins (Risk Committee Chair) | Independent Non-Executive Director |
| Seamus Hughes (Board and Audit Committee Chair) | Independent Non-Executive Director |
| Dara Hurley (CEO) | Executive Director |
| John Finnegan | Non-Executive Director |

Dargan FitzGerald was appointed as an Independent Non-Executive Director on 1 January 2025 and has assumed the role of chair of the Audit Committee.

B.1.4 Board Committees

The Octium Life Board receives support in overseeing its System of Governance from the Audit Committee and Risk Committee. The terms of reference for each are approved by the Octium Life Board and updated as necessary. In addition, each committee Chair provides regular reports to the Board on the matters covered at each committee meeting.

B.1.4.1 Audit Committee

The Audit Committee oversees:

• integrity of the financial statements and regulatory reports,

- effectiveness of its internal and external audit functions,
- reporting procedures,
- risk management framework,
- compliance with legal and regulatory requirements
- system of internal controls.

B.1.4.2 Risk Committee

The Risk Committee:

- oversees the risk management framework
- provides leadership, direction and oversight of the risk management function
- reviews the principal risks and the way they are managed, controlled and mitigated

B.1.5 Independent control functions

Octium Life has established four key independent control functions, who are responsible for providing oversight of and challenge to the business and for providing assurance to the Board on matters relating to the risk management framework and system of internal controls.

- 1. Risk Management
- 2. Compliance
- 3. Actuarial
- 4. Internal Audit

B.1.5.1 Risk management

The Risk Management function, which is under the direct responsibility of the Chief Risk Officer, is charged with the oversight, review and supervision of the identification, measurement, management, reporting and monitoring of the risks to which the business is exposed. The responsibilities of the Chief Risk Officer include:

- To develop and maintain an effective risk management framework that meets the needs of the Company.
- To facilitate the setting of Risk Appetites by the Board.
- To develop and maintain appropriate risk policies and procedures that are consistent with the Group Risk Appetite Statement.
- To develop and maintain a risk register.
- To monitor the impact of emerging issues and how they are managed within the business.
- To ensure a comprehensive understanding of how risks affecting the Company are being managed and monitored and to communicate this appropriately.
- To liaise with Head of Actuarial Function to review the outputs from the risk management framework and to ensure the universe of risks is adequately reflected within capital models.
- To promptly inform the Board and CEO of any material risk limit breach.
- To assess the capital model and provide input into the current and projected future solvency position.
- To facilitate the production of the ORSA report and maintain the record-keeping file.

The Chief Risk Officer reports to the Chief Executive Officer and has direct access to the Chair of the Board and Risk Committee as required.

B.1.5.2 Compliance

The Compliance function, which is under the direct responsibility of the Head of Compliance, is charged with oversight and implementation of the Compliance Policy which aims to ensure the Company complies with all applicable laws, rules and regulations, and conducts its activities in compliance with those laws, rules and regulations.

The Head of Compliance provides advice and guidance in all compliance related matters, by identifying and evaluating all compliance risks associated with the Company's present and future business activities including new products and new business relationships.

The Head of Compliance responsibilities include:

- The design, implementation and execution of a risk-based compliance monitoring plan including reporting and escalation of issues to the Board, Audit or Management Committee as appropriate.
- Assisting in identifying the legal regulatory and code requirements which the Company is required to comply with and advising on new relevant regulations and standards.
- Maintaining a record of all material compliance obligations, together with details of how, when and by whom these are met and of any breaches that have been notified.
- Acting as Money Laundering Reporting Officer (MLRO) and in that capacity, the filing
 of Suspicious Activity Reports with the proper authorities in accordance with
 legislation and the Company's Anti Money-Laundering Policies and Procedures
 ("AML Procedures").
- Guaranteeing data protection framework of the Company is compliant and effective.
- Reviewing staff training processes to ensure appropriate compliance competencies;
 and
- Promoting a culture of compliance across the company.

The Head of Compliance reports to the Chief Risk Officer and has direct access to the Chair of the Audit Committee as required.

B.1.5.3 Actuarial

Please refer to section B.6

B.1.5.4 Internal audit

Please refer to section B.5

B.1.6 Changes to the system of governance

There were no changes to Octium Life's system of governance during 2024.

B.1.7 Remuneration, Employee Benefits and Practices

Octium Life has approved a Remuneration Policy to ensure employee remuneration is aligned with its long-term business strategy, business objectives, risk appetite and values. The remuneration structure is designed to promote sound and effective risk management and does

not encourage risk-taking beyond risk tolerance limits set out in its Board approved Risk Appetite Statement.

B.1.8 Material transactions (with connected persons)

There have been no material transactions with the shareholder, persons who exercise a significant influence on the Group or with members of the Board, other than:

 Albany Capital Limited, a connected undertaking, has issued both non-subordinated and subordinated loans to fund Group acquisitions. The total balances on the nonsubordinated loan and the subordinated loans on 31 December 2024 were €18.1m and €85.2m respectively.

B.2 Fit and proper requirements

The Group is committed to ensuring that all members of its Boards, key function holders and other senior individuals within the Group, behave with integrity, honesty and skill. This commitment is documented in the Fit and Proper policies of Octium Life. The Group has processes in place to ensure appropriate fit and proper standards are met and maintained, both prior to appointment and on an ongoing basis thereafter.

The key elements within fit and proper framework, which apply to individuals undertaking prescribed control functions as well as those subject to pre-approval are:

- A pre-appointment assessment, including an appraisal of the individual's knowledge; professional experience and qualifications; technical capability; prior business conduct and financial judgement; character, honesty and integrity.
- A job description, detailing the significant requirements of the role.
- A probationary period and an appropriate induction program.
- An annual attestation confirming their continued ability to meet fitness and probity requirements.

Where a regulated function is outsourced, the responsible officer with responsible for managing the arrangement ensures the outsourcing firm carries out and maintains appropriate fit and proper assessments. Records are maintained, and notifications are made to the regulators, as and when required.

B.2.1 Individual Accountability Framework

On 9 March 2023, the Central Bank (Individual Accountability Framework) Act 2023 (the "IAF Act") was enacted and it lays the foundations of the Individual Accountability Framework ("IAF") which introduced an enhanced fitness & probity certification requirement for all PCF/CF roles and new Common and Additional Conduct Standards with effect from 29th December 2023.

These were implemented within Octium Life, with the new standards being applicable to all CF and PCF roles from that date.

Additionally the Senior Executive Accountability Regime (SEAR) came into effect from 1 July 2024 requiring the roles and responsibilities of PCF role holders to be documented in a prescribed format aiding transparency on where responsibility, accountability and decision-making for key activity lies within Octium Life.

B.3 Risk management system including the own risk solvency assessment

The Group Risk Management Framework applies consistently across the Group and has been developed to enable the Board and management of the insurance subsidiaries to understand, appropriately manage and mitigate the risks associated with business objectives over the short, medium and longer term.

Risk Committees receives regular reporting from CROs in relation to the outcome of the periodic risk assessments undertaken by Management.

B.3.1 Risk management framework

The Group Risk Management Framework seeks to identify, assess, manage, and report on the risks arising from the pursuit of business objectives. It comprises the entirety of systems, controls, processes and reports used to manage risk and is based on the classic "three lines of defence model". Risk management seeks not to eliminate risk but to manage it to acceptable levels.

B.3.2 Three lines of defence

Within each insurance entity, the first line is responsible for day-to-day operations and identifying and managing the risks that arise from those operations. The second line acts as a "critical friend" overseeing risk management activities and providing advice on the management of risk. The third line provides independent assurance that the risks are being managed appropriately. The model's strength is the clear segregation between "doing", "overseeing" and "independent review". This ensures the appropriate level of perspective and challenge is brought to the management and control of risk. It also facilitates consistency in risk assessments and formalises independent review and assessment of risk and control matters. Where a function is outsourced, first line risk management is carried out by the outsourced provider, with the responsible officer with responsible for managing the arrangement providing oversight.

B.3.3 Risk appetite statement

By its nature the business of the Group involves taking risk. Risk Appetite Statement (RAS) of each insurance subsidiary articulates the level of risk the subsidiary Board is prepared to tolerate in pursuit of business objectives and provides the context for all risk management activities.

The RAS is owned by the insurance subsidiary Board and reviewed annually or more frequently if there is a significant change to the business strategy or external business environment.

B.3.4 Risk strategy and policies

A suite of risk policies exists within each insurance subsidiary that set out the approach to risk management and how particular risks are identified, assessed, managed, and monitored. The policies clearly state the controls, procedures, limits, tolerances, and escalation procedures to ensure risks are managed within risk appetite. Risk policies are reviewed at least annually by the Risk Committee and approved by the subsidiary Board.

B.3.5 Monitoring and reporting risks

Individuals who own or are responsible for managing processes, controls, projects or relationships have a responsibility for risk monitoring and reporting, using a variety of tools such as analysis of management information, communication and relationship management meetings to do so.

B.3.6 Key Risk Indicators

A suite of Key Risk Indicators (KRIs) covering the key risks faced by each insurance subsidiary is maintained, with triggers based upon the risk appetite set by the subsidiary Board to monitor actual risk exposures against stated risk appetite.

The KRIs are reported quarterly to the insurance subsidiary's Management Committee, Risk Committee and Board with a narrative providing detail in relation to any changing risks particularly those nearing risk appetite or which have breached appetite.

B.3.7 Loss event reporting

Data relating to loss events and near misses (events where no loss actually occurred but there was the potential for a loss) is recorded in the risk event log. The nature and root cause of each event is determined, and appropriate action is taken.

B.3.8 Internal audit reviews

The Internal Audit function of Octium Life perform reviews on areas of key risk within the business, providing reports on the design adequacy and operational effectiveness of controls and compliance with internal policies and external regulation/legislation. The Internal Audit function for Octium Life is outsourced to KPMG and is independent of business operations and decisions. Internal Audit reviews are planned on a prioritised basis, ensuring that all key areas of risk are covered on a rolling basis.

B.3.9 Implementation of the risk function

The Group Risk Management Policy sets out the roles, responsibilities, tasks and reporting requirements in respect of all risk matters. The principles underlying the Group's approach to risk management are:

- Business risks and the controls used to manage them are owned by the business
- Risk management is responsible for risk strategy, oversight and the governance of risk
- Risks are managed in a proportionate manner
- A "risk aware" culture is fostered at all levels of the Company

B.3.10 Independent assurance

The Risk, Compliance and Internal Audit functions, at insurance subsidiary level provide independent assessment of the risk management system and report directly to the subsidiary's Board through relevant committees.

B.3.11 Own Risk Solvency Assessment

The Own Risk Solvency Assessment ("ORSA") process is a core part of the Group's Risk Management Framework, as it combines the key processes of risk management, business planning and capital management.

A Group ORSA report covering the Group and Octium Life is produced, at least annually. The report summarise the processes that make up the ORSA, including descriptions of key risks, how they are managed, and how those risks might change in the context of the business plan. They include both qualitative and quantitative assessments of risk profiles and solvency needs on a forward-looking basis. Results arising from stress and scenario testing undertaken on a range of reasonably foreseeable scenarios and other risk assessment activities are documented within the reports along with potential management actions.

The respective Boards direct the ORSA and challenge its outcomes at various stages of the process. The production of the ORSA report is co-ordinated by the Group Chief Risk Officer, with significant input from the Head of Actuarial Function and approved by the relevant Board prior to submission to regulators.

B.4 Internal control system

The internal control system encompasses the policies, processes and activities that contribute to integrity of financial reporting, the effectiveness of operations and compliance with laws and regulations. The Internal Control Framework has the following attributes:

- The Board directs and controls the company, through policies it approves and monitors
 performance against those policies. The CEO and executive management team have
 clear accountability for the implementation of these policies.
- Management of the company is in accordance with the authority delegated by the Board
- Business functions have documented procedures as to how relevant policies are implemented, managed and reported. Control activities are listed which may be preventative or detective in nature and encompass a range of manual and automated activities such as authorisations and approvals.
- There is adequate segregation of duties between functions and within each function to mitigate the risk of loss due to mistakes and inappropriate actions to an acceptable level.
- There are different levels of supervision and review throughout the company:
- Transactions are appropriately recorded to permit the preparation of reliable financial statements.
- Outsourced activities are managed to the same standard as internal activities.

A nominated individual is responsible for oversight of all compliance matters including compliance with laws and regulations. They are responsible for reporting on compliance matters to the Board and/or Audit Committee and for indicating whether appropriate remedial measures have been taken in the event of any deficiencies.

B.5 Internal audit function

The Internal Audit function and Head of Internal Audit have been outsourced to KPMG who operate in accordance with the International Standards for the Professional Practice of Internal Auditing and other relevant codes of conduct. The function provides independent and objective assurance services, in respect of processes, whether carried out by its service providers or by employees, with due regard to the adequacy of the governance, risk management and internal control framework.

Audits are conducted within a Board approved Internal Audit Policy framework. The Head of Internal Audit reports to the Chair of the Audit Committee. The Audit Committee oversees the 'risk based' Audit Plan and reports and monitors implementation of recommendations.

Internal Audit reports highlight any significant control failings or weaknesses identified and the impact they have had or may have and the actions and timings which Management have agreed to take to rectify them.

The effectiveness of the Internal Audit Function as an assurance service depends upon its independence from the day-to-day operations of the business. The Head of Internal Audit provides an annual confirmation of the organisational independence of the Internal Audit function. This confirmation is undertaken through reporting to the Audit Committee.

B.6 Actuarial function

The Group Actuarial Function and Head of Actuarial Function ("HoAF") are outsourced to KPMG (Ireland). The requirements of the HoAF are in line with guidance from the Central Bank of Ireland and the Society of Actuaries, and include, but are not limited to, the following matters:

- Coordinating the work of the actuarial function and advising the Board accordingly.
- Coordinating the calculation of the firm's technical provisions.
- Providing an opinion on the Underwriting Policy and reinsurance arrangements.
- The provision of advice and support to Octium on its solvency requirements.
- Contributing to the effective implementation of the risk management process.
- Modelling of the SCR and Minimum Capital requirement (MCR); and
- Contributing to the ORSA process.

B.7 Outsourcing / Key third party agreements

The Group outsources some of its activities to reputable third parties. Service Level Agreements which set out the roles and responsibilities, policies, and procedures along with relevant KPIs, performance review procedures etc. are in place in respect of outsourced arrangements. Activities relating to financial and regulatory reporting for the holding companies are undertaken with the support of the finance function in Octium Life.

B.8 Any other information

All material information regarding the System of Governance of the Group has been disclosed above.

C. Risk Profile

The Solvency II framework requires, insurers to identify the key risks to which they are exposed. The Group's risk exposures relate primarily to uncertainty over the future revenues and expenses. Octium Life manufactures unit linked insurance products with no investment guarantees. Distribution is provided by the Octium International Insurance Agent, banks and other suitable intermediaries seeking wealth planning solutions for their clients.

The Group Board of Directors has adopted the Standard Formula, as specified in the Solvency II regulation to assess the risks the Group is exposed to and determine the level of SCR. The table below provides a breakdown of the key components of the Group and insurance subsidiaries Standard Formula calculations. Risks to capital and profits are assessed through the Group Own Risk and Solvency Assessment (ORSA).

| Solvency Capital Requirement | Octium Life | | Octium Assurance | | Group | |
|---|-------------|----------|------------------|----------|----------|----------|
| (€′000s) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Market risk | 53,830 | 35,596 | - | 33,825 | 61,221 | 75,369 |
| Counterparty risk | 3,520 | 1,536 | - | 2,222 | 3,476 | 3,485 |
| Underwriting risk | 61,656 | 31,996 | - | 33,895 | 69,357 | 73,584 |
| Diversification effects | (26,409) | (15,141) | - | (15,661) | (29,553) | (33,527) |
| Basic SCR | 92,597 | 53,987 | - | 54,281 | 104,501 | 118,910 |
| Operational risk | 3,541 | 2,067 | - | 1,599 | 3,033 | 4,661 |
| Loss-absorbing capacity of deferred taxes | (7,264) | (4,709) | - | (5,291) | (9,136) | (11,178) |
| Solvency Capital Requirement | 88,874 | 51,345 | - | 50,589 | 98,398 | 112,393 |

C.1 Underwriting risk

Underwriting risk is the risk of loss or adverse change in the values of insurance and reinsurance liabilities, resulting from inadequate pricing and provisioning assumptions.

C.1.1 Risk exposure

The Group's underwriting risk profile is derived from the Standard Formula allowing for the impact of diversification. As of 31 December 2024, the SCR for this module is €69.4m (2023: €73.6.m) with intra-module diversification of 15.5% (2023: 14.9%). The key underwriting risks to which the Group is exposed are set out below:

C1.1.1 Lapse risk

The primary risk is the risk of lapse rates being higher than expected leading to a loss of future income and potential increase in per policy expenses. However the unit linked nature of our business means that the impact on the Group's solvency position is limited since technical provisions, Own Funds and capital requirements would all broadly move in line with the lower level of business.

C1.1.2 Expense risk

Expense risk is the risk that future maintenance expenses are higher than levels assumed in Solvency II balance sheet. Expense risk can arise through mis-estimation, higher than expected inflation, lower business volumes or changes in the business mix or regulatory change.

C.1.1.3 Mortality risk

Mortality risk is the risk of loss due to an increase in mortality rates. The Group's exposure to mortality risk may result in an increase in death cover payments and a reduction in expected future revenues.

C.1.2 Changes in underwriting risk during 2024

The change in the significant intra-module components of the Group and insurance subsidiaries underwriting risk capital requirement is provided in the table below:

| Underwiting Dick | Octium Life | | Octium A | ssurance | Group | |
|---------------------------------------|-------------|---------|----------|----------|----------|----------|
| Underwriting Risk | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Lapse risk | 47,768 | 24,201 | - | 23,073 | 55,974 | 55,522 |
| Expense risk | 20,634 | 11,728 | - | 15,636 | 20,634 | 27,364 |
| Mortality risk | 4,514 | 1,941 | - | 1,160 | 4,953 | 3,423 |
| Longevity risk | 1,112 | - | - | - | 439 | - |
| Diversification effects | (12,495) | (5,953) | - | (6,015) | (12,766) | (12,845) |
| Life Catastrophe risk | 123 | 79 | - | 41 | 123 | 120 |
| Underwriting Risk Capital Requirement | 61,656 | 31,996 | - | 33,895 | 69,357 | 73,584 |

C.1.3 Mitigating actions and controls

The Group, assesses, monitors and controls underwriting risk through a number of methods:

- Product design minimises mortality risk
- Extensive use of reinsurance
- Lapse risk is mitigated by high quality customer care at commencement and throughout the term of the policy
- Expenses are tightly controlled and managed in line with business plans
- Quarterly monitoring of experience against stated risk tolerances
- The Own Risk and Solvency Assessment assesses risks under stressed conditions through a range of stress and scenario testing.

C1.4 Sensitivity and stress testing

Stress and scenario testing conducted as part of the Group ORSA demonstrate the Group's resilience to a range of adverse underwriting stresses. The estimated impact of these sensitivities is shown in the table below:

| | Octiu | m Life | Group | | |
|---|---------|--------------|--------|--------------|--|
| % change following an adverse underwriting stress | SCR | Own Funds | SCR | Own Funds | |
| 50% permanent increase in mortality | (10.0%) | (3.2%) | 6.5% | (3.9%) | |
| 30% mass lapse event | (19.1%) | (21.7%) | (9.8%) | (25.4%) | |
| 10% increase in expenses & 1% increase in inflation | 3.0% | (6.1%) | (9.8%) | (7.12%) | |

C.1.5 Risk concentration

There are no material underwriting risk concentrations.

C.2 Market risk

Market risk is the risk of lower returns or losses arising from adverse movements in market prices. The Group has minimal direct exposure to market risk but retains significant indirect exposure as adverse movements in the value of policyholder assets reduces future policy administration fees. The Group accepts this risk as an inherent element of its business model.

C.2.1 Risk exposure

The Group's market risk profile is derived from the standard formula allowing for the impact of diversification. As of 31 December 2024, the SCR for this module is €61.2 (2023: €75.4m) with intra-module diversification of 21.0% (2023: 28.1%) i.e. allowance for diversification between market risks. The key market risks to which the Group is exposed are set out below:

C.2.1.1 Equity risk

The risk of reduction in policy administration fees and/or value from unfavourable movements in equity asset values.

Equity risk relating to unit-linked assets is borne by the policyholder as any change in the value of the assets underlying the policies are offset by corresponding changes in the value of technical provisions. The Group remains exposed to the change in policy administration fee income which is charged as a percentage of asset values.

C.2.1.2 Spread risk

Spread risk relating to unit-linked assets is borne by the policyholder as any change in the value of the assets underlying the policies are offset by corresponding changes in the value of technical provisions. Like Equity Risk, the Group's exposure is limited to the extent that policy administration fees which are charged as a percentage of unit linked asset values, are reduced.

C.2.1.3 Currency risk

Currency risk is the risk of loss resulting from adverse movements in currency exchange rates. The Group's capital requirement for currency risk reflects the sensitivity of the values of assets, liabilities and in particular future revenues to changes in the level or in the volatility of currency exchange rates.

 The Group has an indirect exposure to currency risk to the extent that unit linked assets are denominated in currencies other than EUR - Approximately 34% of Octium Life's

assets backing policyholder liabilities are denominated in non-EUR currencies of this an immaterial amount of assets are denominated in currencies pegged to the EUR.

- The Group has some direct exposure as a result of policy administration fees or expenses being denominated in currencies other than EUR.
- Some expenses are incurred in non-EUR currencies, in particular CHF.

C.2.1.4 Interest rate risk

Interest rate risk is the risk that fair value of future cash flows of a financial instrument will fluctuate relative to the respective liability due to changes in market interest rates.

The Group's senior and subordinated debt is valued on an accruals basis and therefore their values are unaffected by changes in interest rates. The senior loan is on demand subject to 90 days' notice and the lender may increase interest rates which would increase the future cost of the debt. The subordinated debt, which is undated, is referenced to the EUR 5Y swap rate.

Octium's on-demand cash deposits and cash held in unit linked assets are valued at par and are therefore unaffected by movements in interest rates. A change in interest rates however does change the interest income generated from these deposits.

C.2.1.4 Concentration risk

The risk that holdings in single assets or groups of associated assets magnify the market risk due to the concentrated nature of the exposure due to a lack of diversification.

C.2.2 Changes in market risk during 2024

The change in the significant intra-module components of the market risk capital requirement is provided in the table below:

| Market Risk | Octium Life | | Octium A | ssurance | Group | |
|---------------------------------|-------------|----------|----------|----------|----------|----------|
| Warket RISK | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Equity risk | 40,212 | 25,209 | - | 18,369 | 45,615 | 48,190 |
| Spread risk | 6,727 | 5,129 | - | 4,971 | 7,413 | 10,791 |
| Currency risk | 19,193 | 11,966 | - | 18,492 | 22,434 | 33,633 |
| Interest Rate risk | 146 | 1,883 | - | 1,803 | 382 | 3,290 |
| Concentration risk | 1,604 | 3,833 | - | 5,028 | 1,604 | 8,861 |
| Diversification effects | (14,052) | (12,424) | - | (14,837) | (16,227) | (29,395) |
| Market Risk Capital Requirement | 53,830 | 35,596 | - | 33,826 | 61,221 | 75,370 |

C.2.3 Mitigating actions and controls

The Group, assesses, monitors and controls market risk through a number of methods:

- Insurance subsidiaries comply with SII requirements relating to Prudent Person Principle
- Octium Life's Investment Oversight Committees oversees the investment of unit linked assets to ensure they are invested prudently and, in a manner, to ensure their security, quality and liquidity.
- Investment policy imposes close matching of assets to insurance liabilities.

C.2.4 Sensitivities and stress testing

Stress and scenario testing conducted as part of the ORSA demonstrate the Group's resilience to a significant market stress. The estimated impact on the of the sensitivity explored is detailed in the table below:

| 0/ shapes following an adverse under witing stress | Octiu | m Life | Group | | |
|--|---------|--------------|---------|--------------|--|
| % change following an adverse underwriting stress | SCR | Own Funds | SCR | Own Funds | |
| Equity price shock -30% | (10.7%) | (9.8%) | (12.0%) | (1.1%) | |
| Equity price shock +30% | 15.9% | 8.0% | 11.2% | (4.9%) | |

C.2.5 Investment of assets in accordance with the prudent person principle

The 'prudent person principle' requires insurance companies to only invest in assets and instruments whose risks they can properly identify, measure, monitor, manage, control and report, and appropriately take into account in the assessment of its overall solvency needs. The Group considers these requirements before any investment in new assets or instruments.

The majority of the assets on the SII balance sheet are held in respect of unit linked contracts where the policyholder bears the market risks of the investments associated with their policy. In fact, assets are selected:

- directly by the policyholder (in policies where this option is available, and the policyholder chooses to do so) or
- by the Asset Manager of the mandate(s) underlying the policy (mandate(s) underlying policies are also chosen by the policyholder at the moment of subscription of a policy contract).

In order to mitigate as much as possible risks associated with investments, Octium Life implements investment monitoring processes in accordance with Solvency II prudent person principle and prudently selects asset managers and external funds suitable for policyholders.

Each external fund, before on-boarding, is analysed to verify its compliance with investment rules. Asset Managers are also subject to rigorous due diligence prior to business being placed with them. Asset Managers are issued with a fully documented set of rules and parameters specifying how assets are to be invested within each mandate and what assets are allowed in Octium's portfolios in order to support the policyholder benefits.

Oversight of external funds and Assets Managers is provided by the Investment Oversight Committee of Octium Life. Any investment mandates or limit breaches are escalated for resolution to ensure investments always lie within the parameters set. Additional controls are in place to monitor assets liquidity and quality of their valuation processes.

For instruments where external pricing information is not readily available, the finance team oversees the use of appropriate valuation methods.

C.2.6 Risk concentrations

There are no material market risk concentrations.

C.3 Credit risk

Credit risk is the risk of lower returns or loss if another party fails to perform its financial obligations.

C.3.1 Risk exposure

The Group's credit risk profile is derived from the Standard Formula allowing for the impact of diversification. As of 31 December 2024, the SCR for this module is €3.5m (2023: €3.5m).

Similar to market risk, credit risk on unit linked assets is borne by the policyholder. In addition, the Group has an exposure to credit risk in relation to its deposits with credit institutions, the Italian Tax Authorities and amounts receivable under reinsurance arrangements.

C.3.2 Changes in credit risk during 2024

There has been no material change in the nature of the credit risk exposures during 2024.

C.3.3 Mitigating actions and controls

The Group, monitors and controls credit risk using the following methods:

- Credit risk policy imposing principles and requirements for credit risk management and Investment Policy imposing credit ratings limits for investment counterparties and concentration limits to avoid overexposure to any investment counterparty.
- Regular monitoring of exposures relative to credit risk limits.
- Quarterly settlement of outstanding reinsurance balances.

C.3.4 Sensitivities and stress testing

No credit risk sensitivity or stress testing was completed during 2024.

C.3.5 Risk concentrations

The Group transfers its mortality risk to a single reinsurance company. In certain extreme circumstances this may result in a significant exposure.

C.4 Liquidity risk

Liquidity risk is the risk that the Group does not have sufficient liquidity to meet its obligations when they fall due or would have to incur excessive costs or trading losses to do so.

C.4.1 Risk exposure

The liquidity risk associated with unit linked assets is borne by the policyholder as policy contracts are linked to the liquidity of the underlying assets as well as the value.

The most significant liquidity risk for the Group is a demand for the immediate repayment of its senior debt, which was €18.1m on 31 December 2024 (2023: €22.9m). However, the holder of the senior debt is a connected undertaking and whose strategy is the long-term support of the Group. The Group is also required to service annual interest payments of c. €4.1m on its debt arrangements.

Historically the requirements of the Italian substitute tax have been one of the most significant strains on Octium's liquidity. However, given a reducing cap and the 5-year roll-over relief which became effective in 2016, there is a significant reduction in the annual requirements over

the last number of years. Liquidity is projected to remain strong and support the reduction of senior debt over the business planning period.

However, if the level of funds under management from Italian tax residents were to increase by 10% say (through higher new business volumes or investment returns) then the ITWA cap would also increase by the same percentage leading to additional liquidity requirements.

C.4.2 Changes in liquidity risk exposure during 2024

There has been no material change in liquidity risk exposures during 2024.

C.4.3 Mitigating actions and controls

The Group's objective is to ensure that it has sufficient liquidity to meet the short- and medium-term requirements of the business. As such:

- Octium Life held €77.9m in on-demand cash deposits and money market funds (2023: €62.4m including Octium Assurance AG) and €nil on 90-day notice (2023: €50.2m including Octium Assurance AG) on 31 December 2024.
- Other group entities held a total of €1.3m of on demand cash deposits on 31 December 2024 (2023: €0.7m).

Liquidity risk is principally managed in the following ways:

- Assets of a suitable marketability are held to meet liabilities as they fall due.
- Forecasts are prepared regularly to predict required liquidity levels over both the short and medium term.
- A liquidity buffer is maintained to cover unforeseen events.
- Ongoing monitoring allows mitigating actions to be taken at an early stage if required.

C.4.4 Sensitivities and stress testing

The Group's projected cash position before dividends is expected to improve significantly over the next five years. As part of the Group ORSA the cashflow of the business was subjected to a range of adverse but plausible scenarios. In all cases the Group had sufficient cash inflows to meet liquidity requirements at all times.

| 9/ change following an adverse underwriting stress | Octiu | m Life | Group | | |
|--|--------|--------------|--------|--------------|--|
| % change following an adverse underwriting stress | SCR | Own Funds | SCR | Own Funds | |
| Increase in IWT Cap to 1.75% | (1.0%) | (0.3%) | (1.0%) | (0.4%) | |

C.4.5 Expected profit included in future premiums

As of 31 December 2024, the Group's expected profit in future premiums was Nil (2023: Nil).

C.4.6 Risk concentrations

There are no material liquidity risk concentrations.

C.5 Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems, or from external causes (deliberate, accidental, or natural).

C.5.1 Risk exposure

The Group's operational risk profile is derived from the standard formula allowing for the impact of diversification. As of 31 December 2024, the SCR for this module is €3.0m (2023: €4.7m).

The primary operational risk exposures identified within the business include: Key person risk, system failure including business continuity risk, fraud risk, IT and cyber security, legal and compliance risk, governance failure, outsourcing and adequacy of resourcing.

C.5.2 Changes in operational risk during 2024

There has been no material change in the nature of the operational risks to which the Group is exposed to during 2024.

C.5.3 Mitigating actions and controls

The Group, monitors and reports operational risks using the following methods:

- A robust framework for the oversight and management of operational processes and material outsourcing arrangements.
- Regular Risk and Control Self-Assessment process.
- Incident management process, root cause analysis and learning from adverse experience.
- Oversight exercised by Internal Audit, Compliance and Risk functions.
- Emerging risk workshops are held as required.

C.5.4 Sensitivity and stress testing

The impact of a custodian failure was considered as part of the annual stress and scenario testing program. In this scenario event drivers and likely responses were documented, and an assessment of the adequacy of actions and plans was completed.

C.5.5 Risk concentration

There are no material operational risk concentrations.

C.6 Other material risks

C.6.1 Strategic risk

The risk of loss or other adverse impact on the Group arising from failing to identify and react appropriately to opportunities and/or threats arising from changes in the market, some of which may emerge over a number of years.

Octium prepares and approves an annual plan and budget, and performance is monitored against this plan throughout the year. Octium is significantly dependent on UBS for distribution of its products, bringing concentration risk. The Group accepts these risks as part of the strategy but is actively seeking new distributors to reduce this reliance. The financial impact of these risks materialising is lower profit and reduced solvency. Octium monitors key metrics such as lapses, claims and new business.

C.6.2 Emerging risks

Octium holds workshops with business units as and when new risks arise to analyse these risks and their potential impact on the business.

C.7 Any other information

All material information regarding the Group's risk profile has been set out above.

D. Valuation for Solvency Purposes

D.1 Assets

The valuation of assets for solvency purposes is required to be on a market consistent fair value basis. In general, this is determined in accordance with the financial statements. The Group's consolidated financial statements have been prepared in accordance with Luxembourg Generally Accepted Accounting Principles.

Certain assets are measured and presented to comply with Solvency II principles and differ from the measurement and presentation in the financial statements.

D.1.1 Group

| Reconciliation of assets in F/S to Solvency II | 2024 €′000 | 2023 €′000 | Valuation Approach | Notes |
|--|---------------|---------------|-----------------------|-------|
| POLICYHOLDER ASSETS | | | | |
| Assets held to cover linked liabilities | 8,260,053 | 8,379,549 | Fair Value | D1.4 |
| SHAREHOLDER ASSETS | | | | |
| Cash at bank and in hand | 79,379 | 113,336 | Cost | |
| Italian substitute tax asset | 87,461 | 75,988 | Fair Value | |
| Other debtors and receivables | 14,075 | 9,973 | Fair Value | |
| Tangible assets | 353 | 860 | Amortised Cost | |
| Deferred acquisition cost | 156 | 209 | Amortised Cost | |
| Other financial investments | 2 | 2 | | |
| Total assets | 8,441,479 | 8,579,917 | | |
| Adjustments for Solvency II | | | | |
| Reinsurance recoverable | (8,883) | (12,878) | Fair Value | D1.5 |
| Deferred acquisition cost | (156) | (209) | | |
| Holdings in related undertakings, including | (47) | (150) | | |
| participations adjustment | (47) | (150) | | |
| Tangible asset | (21) | (34) | | |
| Total assets per Solvency II | 8,432,372 | 8,566,646 | | |

D.1.2 Octium Assurance

| Reconciliation of assets in F/S to Solvency II | 2024 2023 €'000 €'000 | | Valuation Approach | Notes | | | |
|--|--------------------------|-----------|-----------------------|-------|--|--|--|
| POLICYHOLDER ASSETS | | | | | | | |
| Assets held to cover linked liabilities | - | 3,574,892 | Fair Value | D1.4 | | | |

| Other debtors and receivables | 15,109 | 1,202 | Cost | |
| Tangible assets | 201 | 186 | Amortised Cost | |
| Deferred acquisition cost | 156 | 209 | Amortised Cost | |
| Other financial investments | 2 | 2 | | |
| Total assets per F/S | 8,440,873 | 4,893,003 | | |
| Adjustments for Solvency II: | | | | |
| Reinsurance recoverable | (8,883) | (1,608) | Fair Value | D1.5 |
| Deferred acquisition cost | (155) | (209) | | |
| Total assets per Solvency II | 8,431,835 | 4,819,186 | | |

D.1.4 Assets held for index-linked and unit-linked contracts

Unit linked assets are measured at fair value for Solvency II purposes as well as in the Group and insurance subsidiaries financial statements.

A large portion of the assets are valued based on quoted prices obtained from an active market (recognised and active exchange). There are some assets which are priced based on inputs other than quoted prices that are market observable. There are also some assets which are priced based on inputs which are unobservable in the marketplace.

The objective of the valuation techniques applied is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

D.1.5 Reinsurance recoverable

This amount represents the reinsurers' share of technical provisions net of reinsurance premiums. Recoverable are valued using the Solvency II criteria which take into account the expected cash flows from recoveries net of reinsurance premiums, discounted according to the risk-free rate curve. The result is a negative asset representing the present value of reinsurance.

The Group has a provision of €176k to cover the excess of future expected death benefits in excess of associated risk fees. No other provision is required in the financial statements for future benefits paid above the value of unit linked assets in the case of death as the amounts, net of reinsurance, are immaterial and there are sufficient profits arising from the policies to cover any costs.

D.1.6 Withholding Tax Asset

Octium Life, as Italian Withholding Tax Agents are required to make an annual tax prepayment to the Italian Tax Authorities of 0.50% of the Italian assets under administration on 31 December, subject to relief in the form of a cap on the overall level of the asset and an offset mechanism which compares payments five years prior to current year recoveries. Contributions to the Italian Revenue are recognised as a tax prepayment asset. Recovery of the asset is

through future policyholder exit tax on chargeable gains, the amount and timing of which is dependent on the level of unrealised gains or losses that exist at policy level. This asset has been valued at cost less any provision for impairment in the statutory financial statements. In the Solvency II balance sheet, the asset is held at face value and the discounting is applied using the Solvency II criteria within Best Estimate Liabilities element of technical provisions.

D.2 Technical Provisions

The technical provisions have been calculated as the sum of a best estimate plus a risk margin in accordance with Articles 75 to 86 of the Solvency II Directive. They represent a realistic estimate of the company's future obligations with an allowance for some deviation for plausible changes in estimation in the form of the risk margin.

The table below sets out the components of the technical provisions as of 31 December.

| Technical Provisions (€'000) Octiu | | um Life Octium A | | Assurance | Group | |
|------------------------------------|-----------|------------------|------|-----------|-----------|-----------|
| Technical Provisions (€ 000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| BEL | 8,083,746 | 4,722,583 | - | 3,480,914 | 8,062,032 | 8,183,057 |
| Risk Margin | 32,059 | 17,252 | - | 18,608 | 38,797 | 37,335 |
| Technical provisions | 8,115,805 | 4,739,835 | - | 3,499,522 | 8,100,829 | 8,220,392 |

The key sources of uncertainty for Octium are investment performance and policyholder behaviour assumptions. The non-unit BEL (negative liability) has increased during 2024 primarily due to increasing provisioning on the Italian tax asset due to reduced gains in the Italian book and an increased yield curve. This was somewhat offset by a reduced expenses BEL due to the increased yield curve.

D.2.1 Best Estimate Liabilities (BEL)

The BEL represents unit linked liabilities less the projected future surplus arising from fees from the existing policies. The BEL is calculated as the discounted value of projected monthly cashflows involved in fulfilling the liabilities under the in-force business. Octium matches all liabilities under unit linked policies with the underlying assets and the policies are valued by reference to the market value of those assets.

The main assumption in calculating the future surplus from the unit linked policies is regarding the level and duration of future expenses and policy lapse rates.

The calculations have been performed on a best estimate basis in accordance with the Solvency II Directive. The underlying policyholder behaviour assumptions are based on policyholder behaviour experience (e.g. surrenders/lapses, fund choices). Economic assumptions have been set consistent with economic conditions prevailing on 31 December 2024. The calculations do not make any allowance for transitional measures or assumed management actions.

D.2.2 Risk Margin

The Risk Margin is an addition to the BEL to ensure that the technical provisions are equivalent to the amount that an insurance undertaking would be expected to be paid in order to take over the insurance liabilities and administer the payment of these obligations as they fall due. The risk margin is calculated as the amount of capital needed to support the SCR over the lifetime of the business.

In calculating the technical provisions Octium does not apply the following:

- 1. Matching adjustment referred to in Article 77b of Directive 2009/138/EC.
- 2. Volatility adjustment referred to in Article 77d of Directive 2009/138/EC.
- 3. Transitional risk-free interest rate-term structure referred to Article 308c of Directive 2009/138/EC.
- 4. Transitional deduction referred to in Article 308d of Directive 2009/138/EC.

The difference between financial statements and the Solvency II valuation of technical provisions is set out in the table below.

| Reconciliation of Technical | Octium Life | | Octium / | Assurance | Group | |
|------------------------------|-------------|-----------|----------|-----------|-----------|-----------|
| Provisions (€′000) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Technical provisions per F/S | 8,260,053 | 4,804,657 | - | 3,574,879 | 8,260,053 | 8,379,081 |
| Other Provisions | (88,453) | (32,631) | - | (54,758) | (88,453) | (87,389) |
| BEL | (87,854) | (49,444) | - | (38,883) | (109,568) | (108,635) |
| Risk Margin | 32,059 | 17,252 | - | 18,608 | 38,797 | 37,335 |
| SII Technical Provisions | 8,115,805 | 4,739,834 | - | 3,499,846 | 8,100,829 | 8,220,392 |

D.3 Other Liabilities

D.3.1 Other Liabilities

These comprise of payments due to Octium's policyholders and intermediaries, the senior and subordinated debt issued by Octium Holding, other creditors such as tax and social insurance and accruals for expenses incurred prior to year-end. No adjustment is required to these valuations for solvency purposes as the amounts held under accounting principles are deemed to be approximations of fair value.

| Other Liabilities (€'000) | Octium Life | | Octium Assurance | | Group | |
|----------------------------------|-------------|--------|------------------|--------|---------|---------|
| | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Creditors arising from insurance | 88,802 | 33,287 | - | 329 | 88,453 | 33,617 |
| Senior Loan | - | - | - | - | 18,052 | 22,885 |
| Subordinated Loan | - | - | - | - | 67,500 | 67,500 |
| Other creditors & accruals | 17,988 | 18,037 | - | 66,913 | 36,646 | 97,938 |
| Deferred tax | 5,864 | 3,309 | - | 5,291 | 15,000 | 11,178 |
| Other Liabilities | 112,654 | 54,633 | - | 72,533 | 225,651 | 233,118 |

D.3.2 Contingent liabilities

For the valuation for solvency purposes, material contingent liabilities must be recognised as liabilities, unlike accounting principles under which they are only recognised if the payment of a liability is probable (more likely than not) and can be estimated reliably. Under Solvency II valuation principles, contingent liabilities are valued on the expected present value of future cash flows required to settle the liabilities over their lifetimes.

The Group had no contingent liabilities on 31 December 2024 or 31 December 2023.

D.4 Alternative Methods for Valuation

Neither the Group nor the insurance subsidiaries use any alternative methods for valuation other than those discussed above where the accounting basis differs from those prescribed under Solvency II.

D.5 Any Other Information

All material information regarding valuation for solvency purposes is set out above.

E. Capital Management

E.1 Own funds

E.1.1 Policies and Processes

Octium Holding is a single shareholder entity whose shares are fully paid up. The Group's own fund items (other than the value arising from the existing policies and the Italian tax assets) are invested in bank deposits.

The Group is at all times required to have own funds available at group level equal to at least 100% of its SCR. The Group sets internal target capital levels above the level of its SCR to ensure timely action can be taken to address a deteriorating capital position.

E.1.2 Analysis of Own Funds

Group own funds are comprised of paid-in ordinary share capital, a paid-up subordinated loan and the reconciliation reserve, as detailed in the table below.

Octium Holding issued a non-subordinated loan to a connected undertaking in May 2017. In December 2017, part of the non-subordinated debt was converted into Tier 1 subordinated debt. However, due to Solvency II limits, not all of available Tier 1 sub-debt is eligible to cover the Group's SCR and MCR. The subordinated debt issued in December 2023 is treated as Tier 1 subordinated debt.

| Analysis of Own Funds | 2024 €′000 | | | 2023 €′000 | | |
|--|---------------|----------|----------|---------------|----------|----------|
| | Tier 1 | Tier 2 | Total | Tier 1 | Tier 2 | Total |
| Share Capital | 31 | - | 31 | 31 | - | 31 |
| Subordinated Liabilities | 67,500 | - | 67,500 | 67,500 | - | 67,500 |
| Subordinated Liabilities – SCR tiering restrictions | (39,211) | 39,211 | - | (39,216) | 39,216 | - |
| Reconciliation Reserve | 113,124 | _ | 113,124 | 113,104 | - | 113,104 |
| Own Funds Available to meet SCR | 141,444 | 39,211 | 180,655 | 141,419 | 39,216 | 180,635 |
| Subordinated Liabilities – MCR tiering restrictions | - | (30,355) | (30,355) | - | (29,101) | (29,101) |
| Own Funds Available to meet MCR | 141,444 | 8,856 | 150,300 | 141,419 | 10,115 | 151,534 |

The reconciliation reserve is made up of retained earnings as per the consolidated balance sheet and the projected future surplus arising from fees from the existing policies (i.e. technical provisions excluding unit reserves) net of deferred tax liabilities. A reconciliation between equity as shown in the financial statements and the Solvency II excess of assets over liabilities is shown below.

There are no restrictions to the fungibility and transferability of the related undertaking's own funds within the Group.

The decrease in Group own funds available to meet SCR from 31 December 2023 to 31 December 2024 is mainly as a result of the present value of future profits relating to assets under management. This was partially offset by an increase due to the increasing EIOPA yield curve and its impact on the expenses BEL.

E.1.3 Reconciliation of equity in the Financial Statements and Own Funds (excluding tiering restrictions)

| Reconciliation of Equity to Own Funds | 2024 €′000 | 2023 €′000 |
|--|---------------|---------------|
| Total Equity per F/S | 58,397 | 65,816 |
| Solvency II BEL | 109,568 | 108,635 |
| Solvency II Risk Margin | (38,797) | (37,335) |
| Deferred Tax Liability | (7,736) | (11,178) |
| Reinsurance Recoverable | (8,883) | (12,879) |
| Adj re inter-company holdings | 762 | 285 |
| Deferred acquisition cost | (156) | (209) |
| Excess of Assets over Liabilities | 113,155 | 113,135 |
| Subordinated Liabilities | 67,500 | 67,500 |
| Own Funds (excluding tiering restrictions) | 180,655 | 180,635 |

The Group's own funds bear the following features:

- 1. They are not subject to transitional arrangements.
- 2. No deductions have been applied to own funds.
- 3. There are no ancillary own funds.

E.2 Solvency Capital Requirement and Minimum Capital Requirement

The Group calculates its solvency capital requirement using the consolidation-based method (Method 1). The amount of Group's SCR and MCR on 31 December 2024 are €98.4m and €44.3m respectively (2023: €112.4m and €50.6m).

The table below shows the components of the SCR (using the Standard Formula) on 31 December for the Group and insurance subsidiaries:

| Solvency Capital Requirement (€'000s) | Octium Life | | Octium Assurance | | Group | |
|---|-------------|----------|------------------|----------|----------|----------|
| | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |
| Market risk | 53,830 | 35,596 | - | 33,825 | 61,221 | 75,369 |
| Counterparty risk | 3,520 | 1,536 | - | 2,222 | 3,476 | 3,485 |
| Underwriting risk | 61,656 | 31,996 | - | 33,895 | 69,357 | 73,584 |
| Diversification effects | (26,409) | (15,141) | - | (15,661) | (29,553) | (33,527) |
| Basic SCR | 92,597 | 53,987 | - | 54,281 | 104,501 | 118,910 |
| Operational risk | 3,541 | 2,067 | - | 1,599 | 3,033 | 4,661 |
| Loss-absorbing capacity of deferred taxes | (7,264) | (4,709) | - | (5,291) | (9,136) | (11,178) |
| Solvency Capital Requirement | 88,874 | 51,345 | - | 50,589 | 98,398 | 112,393 |

The increase in the SCR ratio in Octium Holding is primarily driven by changes to the SCR ratio at the entity level.

The Group has not opted to use the duration-based equity risk sub-module, of the Solvency II regulations.

E.3 Differences between the standard formula and any internal model used

The Group does not use an internal model.

E.4 Non-compliance with the MCR and non-compliance with the SCR

There was no breach of the Solvency Capital Requirement (and hence the Minimum Capital Requirement) over the reporting period.

E.5 Any Other Information

The Group uses EIOPA's Solvency II Standard Formula. It does not use specific parameters and does not use simplified calculations in its computation of capital requirements.

Appendix A: Quantitative Reporting Templates
